PROFILE

I have a passion for development. I am social, technical, and computer interested. I am very careful in all respects and easy to learn new thing. I am calm and stress-resistant and work very well in collaborative situations. I like to fix and solve problems.

My aim is to work as a system developer in a company where I get the opportunity to convey the interest in development and technology as well as contribute my skills as a system developer and my experience in my working life.
